

AROUND

Technical rider

Performance for 8 dancers

Time : 30 minutes

Capacity : 800 people

Set up : 2 hours (daytime) 4 hour (night)

Take down : 2 hours

Overlap : 30 minutes

Repetition : Important for dancers, 2h of repetition on space after overlap

Choreographer : Olivier Germser / +33 (0)6 82 69 74 29 / olivier1@tangosumo.com

Lighting director : Loïc Lostanlen / +33 (0)6 70 64 07 11 / loic.lostanlen@wanadoo.fr

Production / Diffusion : Thaïs Le Saux / +33 (0)2 98 62 10 13 / tangosumo@tangosumo.com

Space required : A circle drawn in a space of 16m x 16m

Total space with audience : 24 x 24m

Flat ground (no mats, no flagstones, not a field)

No noise pollution if possible

NB : Around is a very physical choreography, to avoid any complications for the dancers, it would be preferable to avoid scheduling the performance during the hottest part of the day, the ideal moment being the evening or at night.

To be provided by the organizers

► Staff

Day time : 1 sound technician

Night time : 1 sound technician + lighting technician

2 people to reception the audience

security of area

► Equipment

Sound : 1 professional sound system adequate for an audience capacity of 800 spectators (8 point stereo speakers preferable, 4 point minimum)

Recommended model : D&B, C.Heil, Adamson, Martin Audio,...

Sound processing: CD player or computer linked sound system (CD player)

Provisions to be made : 2DI / cables / CD player (spare) + order microphone+ mixing desk

The sound system should be adjusted by the technician before the company arrives.

Electric power supply required for sound system independent of lighting system(16 amps)

AROUND

To be provided by the organizers

► Equipment

Technical control : 1 tent (3m max wide - e.g. protente, vitabri) + table

Regarding the lighting of the show, the technical rider is related to the expected performance schedule. Optimal representation requirements are somewhere at dusk, at a time when the day will soon give way to the night ... (we wish to keep the public street lighting). In this case, provide :

- 12 Pars 64x 1 kw CP 62 on platinum
- Electric supply : 3 x 32 amps
- 1 power block (6 circuits of 3 kw)
- cables for electric supply of power block
- light console with complete circuit installed by sound technician (+ cable DMX)
- Multisockets: 12 x 3 sockets
- Extension leads 2,5 mm² : 5x25 m, 2x 10m, 2x5m

Check plan for layout page 4

If nocturnal performance "in the black night" and in dark places without public lighting, our application will be created in one corner (the one chosen for the control) strong leadership light to illuminate the playing area from sources placed in height from 6 to 7m. Several options *:

- 12 Pars 64x 1 kw CP 62 on a Samia tower
 - 12 Pars 64x 1 kw CP 62 on a Wind Up stands minimum 6m in height
- In all cases, provide the supporting structure, the ballast, PARS or PC, cables, lighting board, power supply unit and adapted to the chosen solution.

Check plan for layout page 5 and see picture on page 3

Don't hesitate to contact us for more details.

► Various

Authorisation to drive/ park on area (company's car)

Parking place near-by.

Equipment provided by the company :

For night time performances, the company will provide 60 led lamps on rechargeable batteries. The lamps are at ground level around the performance area for a low angle lighting effect. (somewhere to recharge the batteries will be needed if there is more than one performance scheduled)
